DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 7, and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,184,581 (hereafter Cornell).

Cornell discloses, referring to figure 6, an array of elongated conductive joints (triangles pointing left) having a length longer than the width and a contacting area (triangle pointing right) having an area approximate to the conductive joint area and positioned to accommodate thermal mismatch stress (see col. 6, lines 20-25) [claims 1, 7], wherein the contacting area is orthogonal to the conductive joints (see figure 2) [claims 2, 8].

Response to Arguments

In view of the appeal brief filed on 11 July 2003, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Applicant's arguments with respect to claims 1, 2, 7, and 8 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's previously alleged, that Cornell does not "address ant problem involving contacting interfaces where there are both electrical and stress related portion of a contact area". However, Cornell clearly states the invention to address the above problem (see col. 3, lines 10-45). Therefore the traversal of the rejection on this ground is deemed unsuccessful.

Allowable Subject Matter

Claims 3-6 and 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,834, 848, grated to Iwasaki discloses methods of reducing stress due to thermal mismatch.
